

Making mining safer.

With Seatbelt Sensors as standard, we're helping drivers stay safe all the time. Our Fleet Management solution includes various safety features that can be remotely monitored in real time through an online portal. Such features include a Rollover and Impact Sensor, Driver ID system and more. At Ctrack we use both cellular and satellite technology to ensure continuous communication no matter how remote the location. So trust our intelligent Fleet Management solution to make mining safer for you.
